

Replacement Electrodes

CLF-39

Complete flow-cell package

Package includes two threaded male adapters and two reduced bushings so this can be installed on 1 1/2" pipe or 2" pipe. Also include is an "O" ring for proper sealing. Electrodes are 3" in length, 1 3/4" "half-moon" in diameter each. Electrodes are comprised of copper and silver.

Part # CLF-39 • Retail Price \$199.95

CLE-25

Commercial electrodes – 10" long in 3" plug – "Biggie Size"

Extra length commercial electrodes – 10" long sealed in a 3" threaded plug. Same as the above (CLE-05) electrode, but 40% longer. Ideal for warm water applications where a lot of copper/silver ions are required. If upgrading from the 6" electrode, you need to make sure these monster sized electrodes will screw into the existing chamber. 1 3/4" "half-moon" diameter. Electrodes are comprised of copper and silver. Schedule 40 pvc.

Part # CLE-25 • Retail Price \$259.95

CLE-11

Replacement electrodes for above system / RS-50 / Star 2001 Series / RC-50 ionizers by Clearwater Enviro

Replacement only electrode chamber that screws into the black-tee as shown above in part # CLF-39. Comes with new "O" ring. THIS ELECTRODE CHAMBER WILL ONLY WORK WITH THE SPECIAL BLACK TEE ASSEMBLY THAT COMES WITH THE RS-50 / RC-50 / STAR 2001 SERIES UNITS MADE BY CET OR IF YOU HAVE THE COMPLETE FLOW-CELL PACKAGE LISTED ABOVE. Electrodes are 3" in length, 1 3/4" "half-moon" in diameter each. Electrodes are comprised of copper and silver.

Part # CLE-11 • Retail Price \$169.95

CLE-23

Commercial electrodes – 6" long sealed in 2 1/2" plug

For commercial models requiring the electrodes to screw into a 2 1/2" threaded tee. 6" long electrodes sealed in a 2 1/2" threaded plug. Electrodes are 1 3/4" "half-moon" in diameter, 6" long, electrodes are comprised of copper and silver. Schedule 40 pvc.

Part # CLE-23 • Retail Price \$199.95

CLE-02

R-20 / R-40 / R-200 & many competitors / Superior Style

This electrode assembly will work on many of the CET models, R-20 and R-40 models, and the old Clearwater Pool Tech model R-200! This one-piece "capsule" screws into any 2" threaded tee. Works on many competitor models – just need a 2" threaded end of the tee to screw into. Electrodes are comprised of copper and silver, 3" in length and 1 3/4" "half-moon" in diameter. Schedule 40 pvc.

Part # CLE-02 • Retail Price \$149.95

CLE-26

SPA-2R, Caribbean Clear Spa & many competitors

Designed for the SPA-2R Clearwater Enviro and Clearwater Pool models, as well as the Caribbean Clear Spa model. Similar to the CLE-03 electrodes, but the electrodes are 1 1/2" long. 1 1/2" "half-moon" in diameter, electrodes are comprised of copper and silver. Electrodes are sealed in a 2" threaded plug. Schedule 40 pvc.

Part # CLE-26 • Retail Price \$89.95

CLE-02(AR)

Same as above (CLE-02) with air-release valve

The exact same electrode chamber (CLE-02) as above, but with an air-release valve to prevent an air-pocket in case the flow-cell chamber was installed in an upward position. 3" long electrodes, 1 3/4" "half-moon" diameter. Electrodes are comprised of copper and silver. Schedule 40 pvc.

Part # CLE-02(AR) • Retail Price \$154.95

CLE-01

SPA-1R & many competitors

This unique electrode chamber is similar to the CLE-02, except the electrodes are 1 1/2" long and are designed for spa models including the Clearwater Enviro and Clearwater Pool SPA-1R models. Will work on many competitors units, also. 1 3/4" "half-moon" diameter electrodes are comprised of copper and silver. Electrodes are mounted on the side of the clear capsule to keep them out of the direct flow of the water. Schedule 40 pvc.

Part # CLE-01 • Retail Price \$124.95

CLE-05

Commercial electrodes – 6" long in 3" plug

For all of our commercial models – the old C-series and the current CS- series. 6" long electrodes glued in a 3" threaded plug. Electrodes are comprised of copper and silver. 1 3/4" "half-moon" diameter. Schedule 40 pvc.

Part # CLE-05 • Retail Price \$199.95

CLE-21

Electron Pure electrodes / 3" long electrodes in 2 1/2" plug

Replacement electrode assembly for "Electron Pure" ionization systems. Pair of 3" long electrodes sealed in a 2 1/2" threaded plug. 1 1/2" "half-moon" in diameter, electrodes are comprised of copper and silver. Schedule 40 pvc. We sell a lot of these every season; this is the replacement for owners of "Electron Pure" systems!

Part # CLE-21 • Retail Price \$149.95

CLE-06

Commercial electrodes - 6" long in 4" plug

Same as the CLE-05, but sealed in a threaded 4" plug. 6" long electrodes, 1 3/4" "half-moon" diameter. Electrodes are comprised of copper and silver. Schedule 40 pvc.

Part # CLE-06 • Retail Price \$199.95

CLE-03

Old Clearwater Pool R-150 electrodes / Caribbean Clear & many other competitors

3" long electrodes sealed in a 2" threaded plug that simply screws into any 2" threaded tee. Will work on the old Clearwater Pool R-150 units. Will work on Caribbean Clear units (the R-50 will lose its temperature readout capabilities with this particular set). The electrodes are comprised of copper and silver, 3" long, and 1 1/2" "half-moon" in diameter. Unbeatable price for this classic electrode! Sealed in a threaded 2" plug. Schedule 40 pvc.

Part # CLE-03 • Retail Price \$139.95

Replacement Electrodes

Flow Cell Chambers

CLE-13

“Caribbean Clear” – R-50 replacement bars

Replacement bars for the Caribbean Clear Model R-50 electrodes. These are the bars only. 3” long bars, 1 1/2” half-moon in diameter. Electrodes are comprised of copper and silver. Bars only. No hardware.

Part # CLE-13 • Retail Price \$99.95

CLE-20

**Industrial / Cooling Tower electrodes
90% copper / 10% silver**

Designed for the CT series. Works on systems requiring higher silver content. 90% copper and 10% silver. Bars are 7” long, 1 cubic inch. Sealed in a special schedule 80 3” threaded plug. Made for the CT-75, CT-150, CT-225 and CT-300 systems. Certified mineral content.

Part # CLE-20 • Retail Price - Call for pricing

CLE-14

**Industrial/Cooling Tower electrodes
80% copper / 20% silver**

80% copper, 20% silver bard – 6” long, 1 cubic inch, sealed in a 3” threaded schedule 80 plug. Certified mineral content. Due to the high cost of copper and silver today, we do not keep a large inventory of this electrode in stock.

Part # CLE-14 • Retail Price - Call for pricing

CLE-27

**Industrial / Cooling Tower electrodes
50% copper/50% silver**

Copper/silver electrodes sealed in a 3” threaded schedule 80 plug. 50% copper and 50% silver. Bars are 6” long, 1 cubic inch. Certified mineral content. This bar is special order only due to the high cost of copper and silver.

Part # CLE-27 • Retail Price - Call for pricing

CET-A180

**Industrial / Cooling Tower BARS ONLY
90% copper/10% silver**

Copper/silver bars only, 90%/10%. 7” long, 1 cubic inch. Certified mineral content. Bars sold individually, not as pairs. Specify if you want them tapped and drilled or not.

Part # CET-A180 • Retail Price - Call for pricing

CET-A181

**Industrial / Cooling Tower BARS ONLY
80% copper / 20% silver**

Copper/silver bars only, 80%/20%. 6” long, 1 cubic inch. Certified mineral content. Bars sold individually, not as pairs. Due to the high cost of copper and silver today, we do not keep a large inventory of this bar in stock.

Part # CET-A181 • Retail Price - Call for pricing

CET-A182

**Industrial / Cooling Tower BARS ONLY
50% copper/50% silver**

Copper/silver bars only, 50% copper/50% silver. 6” long bars sold individually, not as pairs. 1 cubic inch. Due to the high cost of copper and silver today, we do not keep an inventory of this bar and is special order. Certified mineral content.

Part # CET-A182 • Retail Price - Call for pricing

CLF-01

2” slip/slip/threaded tee with reducer, two bushings to 1 1/2” (3 parts)

For R-20, R-40, SPA-1R, SPA-2R, old R-150, R-200 Clearwater models. Also, Caribbean Clear and many other competitors.

Part # CLF-01 • Retail Price \$10.50

CLF-40

Black flow-cell chamber for RC-50 /RS- 50 models

For RC-50, RS-50 models of Clearwater Enviro. Used only with CLE-11 electrodes. One of a kind chamber made those electrodes. Easy “tool-free” operation.

Part # CLF-40 • Retail Price \$24.00

CLF-49

Commercial flow cell chamber - 3” / all CS models

3” x 3” x 3” tee with clear extension. Schedule 40. Three inch in/out pipe and 3” for electrode chamber. Schedule 40.

Part # CLF-49 • Retail Price \$45.00

CLF-48

Commercial flow cell chamber – 4” / all CS models

4” x 4” x 3” tee with clear extension. 4” in/out pipe and 3” for electrode chamber. Schedule 40.

Part # CLF-48 • Retail Price \$48.50

CLF-51

Commercial flow cell chamber – 3” cross tee – all CS models

3” x 3” x 3” x 3” cross tee with clear extensions, schedule 40.

Part # CLF-51 • Retail Price \$68.50

CLF-52

Commercial flow cell chamber – 4” cross tee – all CS models

4” x 4” x 3” x 3” cross tee with clear extensions, schedule 40. 4” in/out pipe and 3” for electrode chambers.

Part # CLF-52 • Retail Price \$84.50

CLF-57

Industrial flow cell chamber – 3” tee – all CT models

3” x 3” 3” tee with clear extension for all cooling tower (CT) models. Schedule 80 pvc.

Part # CLF-57 • Retail Price \$94.50

CLF-58

Industrial flow cell chamber – 4” tee – all CT models

4” x 4” x 3” tee with clear extension for all cooling tower (CT) models. Schedule 80 pvc. 4” in/out pipe and 3” for electrode chamber.

Part # CLF-58 • Retail Price \$118.50

Silver Electrodes – 99.999%

The purest silver on earth!! 99.999% silver in standard 10 troy ounce size. For drinking water systems and other ultra pure applications. Available in 3” plug, 4” plug or clear jar similar to the CLE-11, or by the plain bars only. Lead time is generally 3 business days to fabricate – special order only.

CLE-07 - Pair of 10 troy ounce bars sealed in 3” plug. Call for pricing. Based on current price of silver.

CLE-08 - Pair of 10 troy ounce bars sealed in 4” plug. Call for pricing. Based on current price of silver.

CLE-17 - Pair of 10 troy ounce bars sealed in clear jar. Call for pricing. Based on current price of silver.
