

Six Flags Fiesta Texas, San Antonio Texas Tornado Test Trial

Chemical Savings Analysis & other Benefits

Prepared by Vision Design, San Antonio, Texas dealer of Clearwater Enviro Tech

Major Benefits Realized

On August 8th 2011, Vision Design of San Antonio, a Texas dealer of Clearwater Enviro Tech, installed a MineralPURE and ScaleBlaster unit on the Texas Tornado at the Six Flags Fiesta Texas waterpark.

MineralPURE is a copper/silver ionization system that will greatly reduce chlorine use in the pool while ScaleBlaster will remove scale buildup without salt, chemicals or maintenance.

Within three weeks, Six Flags of San Antonio realized these great results:

- Increased water clarity
- Increased water flow
- Savings of 74% in chemical use

Testing & Results

- Dark Blue = chemical usage without Clearwater's program
- Light Blue = chemical usage with Clearwater's program
- Program needed at least one week to establish appropriate copper levels to be effective
- Program started on 8/8/11
- Last 3 weeks average savings 74% chemicals

Additional Benefits & Savings

- Reduction of maintenance cost by removing scale
- Reduction of affects of corrosive chemical on pumps/piping, thus increasing life span
- Reduction of chemicals, resulting in a more desirable water park for consumers (no red eye and chlorine smell)
- Reduction Cyanuric Acid due to reduced chlorine
- 100% Reduction sequestering agent during test trial
- Additional chlorine savings can be gained by adjusting oxidation reduction potential to maintain 1 ppm chlorine
