Dear Jeff:

We just wanted to let you know how pleased we are with our chlorine-free pool and spa thanks to Clearwater Pool Technology. I never dreamed we could have pool and spa water so crystal clear and clean without using harsh chemicals. Best of all, it is so comfortable to be in the water without chlorine irritation to eyes, nose and mouth.

The system works beautifully and is so easy to maintain. It is one of the best additions we've made for our home. As an added bonus, we have the satisfaction of knowing that we're not polluting the environment. I highly recommend it to every pool owner.

Sincerely,

Mr. Sharp Atkinson

Dear Sharp:

## Clear Water Purification

CLEAR WATER was installed approximately eleven months ago on my outdoor pool. I have closely monitored this system. The system has proven to be very cost efficient. Since installation, my chemical supply cost has been reduced by 90%.

The replacement of my pool purification system which relied entirely on chlorine has been a positive experience. There has been no chlorine odor nor irritation to eyes and skin. Use of .5 chlorine has kept the pool to optimum clarity.

The most positive effect of the CLEAR WATER system is the elimination of algae. I have noticed no algae growth in my pool in the last eleven months.

I have no hesitation in recommending the CLEAR WATER treatment system to any swimming pool operator.

Yours sincerely,

Ronnie Mayers

Dear Brian,

I am writing on behalf of the Green Valley Country Club, of which I am currently the Vice-President and Chairman of the Outdoor Committee which oversees our two pools.

We want to let you know how pleased our membership was with the ionization system that you installed in both our recreational and our competition pools at Green Valley this summer. Not only was the quality and clarity of water better than ever before, swimming was a great deal more comfortable than in the past when chlorine was the sole purifying agent. There were no more red-eyes, green hair, bleached suits and dry, scaly skin. Our competitive swimmers and lap swimmers especially appreciated not having to suffer through long workouts in a highly chlorinated pool.

This was a truly win-win endeavor for us, as our pool was not only more swimable, but we cut our chlorine costs from previous years by about two-thirds. We calculate that we will pay off our investment in less than two summers.

And lastly, the installation, service and constant vigilance that you performed were outstanding. Based on my experience with your product and service, I have already recommended that the Wilson pool be converted to the Clearwater ionization system for the same reasons. In my forty-year career as a swim coach and aquatic specialist, this is one of the best investments I can recommend to any pool owner. I wish I would have known about it years ago.

Thanks for a great job.

Sincerely,

Roy Snyder

Dear Jeff:

I wanted to write you to inform you of how satisfied I am with the pool and hot tub units that you sold me. As you know, I purchased a house with a hot tub and pool in 1992. During the first year, I took care of these using the traditional chlorine and bromine methods. I found it to be time consuming and expensive. Furthermore, both the pool and hot tub had the traditional "smell" and skin drying effect from the chemicals.

After purchasing your units, I can honestly say that maintenance for both became almost nonexistent. Moreover, the water was a lot more enjoyable to be in because of the lack of the chemicals. I have always enjoyed underwater swimming and with your units I was able to have my eyes open without any of the typical burning sensations. Even after having many people in the hot tub for several hours the water stayed very clear and fresh.

As you know, I recently moved to a new location. I purchased a new hot tub that had an "ozonator" unit on it. The salesman told me that the ozinator would make the unit "almost maintenance free". I have not found this to be true. After several people are in the hot tub for a while, the water gets cloudy and it sometimes takes several days to clear up. Furthermore, I have found myself having to clean the filter a lot more often than I did with my old hot tub. Recently I have had to clean the filter every week because of the residue that has built up on it. When the filter is dirty, the ozinator does not work at all because for some reason not enough water is sent through the system.

I find the "ozonator" to be better than the chemical method but not even close to the effectiveness of your units. That is why I am currently in the processes of purchasing another unit from you and

I am truly looking forward to the convenience it will provide me.

Overall, I cannot say enough about how happy I am with your products. They make owning a pool and hot tub very easy and much more enjoyable. Recently, I recommended this system to one of the partners in my firm who obtained a unit for his pool and he has raved about his ability to swim laps with his eyes open.

I simply will not own another pool or hot tub without having one of your units on it and I highly recommend them to anyone who owns a pool or hot tub.

Sincerely,

Brian W. Palmer

Lyman, Wy. 82937

Dear Gene;

Since you installed the ClearWater Ionization unit on the Mt. View High School swimming pool, we have noticed some dramatic changes in our pool which we are very happy with.

We are now keeping our chlorine level at 1 ppm and have reduced the amount of chlorine that we are using by about half.

I find that I am not spending as much time with the pool to have it look good. In fact, the pool kind of sparkles now, with less effort from me, and I really appreciate that.

I just want you to know that I am very happy with the results that I have seen with the ClearWater Ionization unit, and I would not hesitate to recommend it to anyone. It is doing just what you promised me it would do.

Sincerely,

Sam Tillotson  
Pool Director
